

Task #1: Problem: To identify given graphs by cycling applicable terms

1)  To Cycle all applicable terms: Graph Tree Forest If it's a graph, what type of graph? Weighted Directed Biparty Complete Connected Cyclic DAG(directed acyclic)	2)  To Cycle all applicable terms: Graph Tree Forest If it's a graph, what type of graph? Weighted Directed Biparty Complete Connected Cyclic DAG(directed acyclic)	3)  To Cycle all applicable terms: Graph Tree Forest If it's a graph, what type of graph? Weighted Directed Biparty Complete Connected Cyclic DAG(directed acyclic)
How many edges? _____ How many cycles? _____ Total weight? _____	How many edges? _____ How many cycles? _____ Total weight? _____	How many edges? _____ How many cycles? _____ Total weight? _____

Task #2: BFS exercises

1) Consider this given graph: 	Default BFS order: _____ BFS order starting from Vertex c: _____ BFS order starting from Vertex e: _____ BFS order starting from Vertex m: _____
--	--

2) Consider this given graph:

Default BFS order:

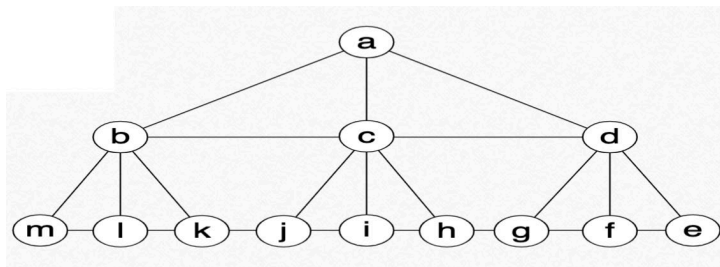

BFS order starting from Vertex c:

BFS order starting from Vertex e:

BFS order starting from Vertex f:

Task #3: DFS exercises

1) Consider this given graph:

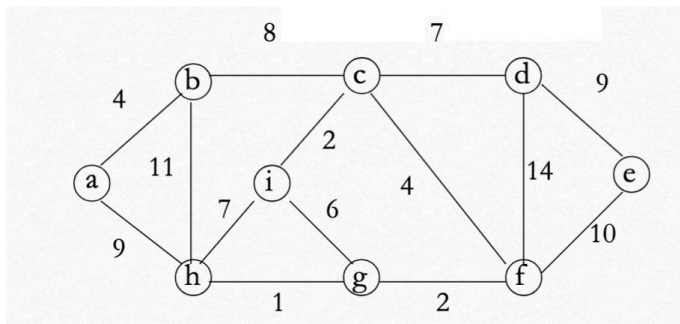

Default DFS order:

DFS order starting from Vertex c:

DFS order starting from Vertex e:

DFS order starting from Vertex j:

2) Consider this given graph:

Default BFS order:

DFS order starting from Vertex c:

DFS order starting from Vertex e:

DFS order starting from Vertex g:
